Dear Dr. Vardy:

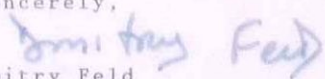

Thank you very much for your interest in sport of luge and many thanks for your generous offer to assist our National Luge Team athletes in Lillehammer and back home in Lake placid, NY. Members of our National Luge Team are looking forward to working with you.

As you know during training and competitions our luge athletes some times experience dental and orthodontic discomfort. This discomfort can be very painful and affect the performance of our athletes. I hope that with your research and actual clinical help, we can overcome these problems.

In the near future I will invite you to one of our summer luge camps were you can examine all of our athletes. I will appreciate all of your recommendations.

Thank you very much for your interest and help.

Sincerely,

Dmitry Feld
Public Relations Manager
